Re: Amendment After Final

Ms. Lillis, this is a request that I have never made in the entire 28 years of my practice, but this situation is so bizarre that I would like to make a special request to you. Yesterday, I filed an Amendment After Final for USSN 10/729,896 (inventor: Joseph C. Hurlburt), and earlier today I filed a Supplemental Amendment After Final because I had forgotten to make a voluntary amendment (not one required to be responsive to a rejection) that I had noted in the Remarks to correct a defect in Claim 36 which I noticed while preparing the response to the Office Action.

My request is thus: If you are going to sign off on anything for this patent application that is not a complete allowance of the claims, I would greatly appreciate the opportunity to discuss the Office Action and the response thereto that has just been filed with you directly. Thank you for your consideration.
